European Law Institute (ELI) Annual Conference and Meeting 2019

Digital Law Special Interest Group's panel on

Algorithmic Regulation and Legal Services

Juridicum, Schottenbastei 10-16, 1010 Wien

6 September 2019

14:00–16:00

AGENDA

The rapid pace of technological innovation has a disruptive impact on the market for legal services. Legal Tech startups promise to offer easy and automated access to justice and challenge traditional providers of legal services. Legal text analytics powered by artificial intelligence and data-driven prediction of court decisions have the potential of changing the way how our legal system works. The panel brings together leading experts from law and computer science and offers an overview over innovative research projects in the field.

Programme

14:00–14:10	**Welcome addresses, Scope and Aims of the Panel** Alberto De Franceschi (University of Ferrara and European University Institute, Florence)
14:10–15:30	**Artificial Intelligence and Liability Law** Herbert Zech (Humboldt University Berlin and Weizenbaum Institute, Berlin) **Metaphors, Judicial Frames and Fundamental Rights in Cyberspace** Oreste Pollicino (Bocconi University, Milan)

Granular Society - Granular Law? Individuality and Normative Models in the Data Society
Christoph Busch (University of Osnabrück)

Smart Contracts on a Blockchain: a New Paradigm to Automate Contractual Relationships
Michele Marchesi (University of Cagliari)

15:30–15:50	**Discussion and Perspectives for the creation of a New ELI Working Group on Algorithmic Regulation and Legal Services**
15:50–16:00	**Concluding Remarks** Christoph Busch (University of Osnabrück)
